

**PERMANENT TRAINING MASTER IN
NEUROPSYCHOLOGICAL REHABILITATION (120 ECTS)**
INSTITUT GUTTMANN
by the Universitat Autònoma de Barcelona

1ST EDITION 2023-2025

The objective of the master's degree is to train Professionals specialized in the evaluation and neuropsychological rehabilitation of people with brain damage and the child and adolescent population with neurodevelopmental disorders.

It is structured in 120 ECTS, of which 96 ECTS correspond to practical training (2.200 hours of face-to-face practices).

Specific objectives:

- Know the main pathologies that cause brain damage or neurodevelopmental disorders and that cause neuropsychological alterations.
- Carefully use the main instruments used in the neuropsychological evaluation of patients with brain damage or neurodevelopmental disorders.
- Design and implement neuropsychological rehabilitation programs and be able to monitor them to analyze their effectiveness.

- Acquire basic methodological skills to carry out clinical research with patients with neuropsychological alterations of neurological origin.

Guttman Barcelona, Institute of Salud Barain Health and Neurorehabilitation
