

**STUDENT GUIDE:
MODULE:
PROFESSIONAL PRACTICUM**

Coordinator:

Dra. Rocío Sánchez-Carrión Abascal
rsanchezcarrion@guttmann.com

UAB Code: 42198

Modality: required

for professional orientation students
15 ECTS

2nd semester of the 2020-2021 academic year

Objective

This module is a fundamental element in the training of students of the master in Neuropsychological Rehabilitation and Cognitive Stimulation and can be considered as a backbone of all the training of this.

The practicum supposes the immersion of the students, during a period of at least five weeks (210h.), in the activities of Diagnosis and Neuropsychological Treatment offered by the Guttman Institute, to know directly, integrate the theoretical-practical knowledge in real contexts, begin in the practical activity in Neurorehabilitation and acquire their own criteria in relation to the rehabilitation and research of cognitive functions.

Competencies	Learning outcomes
CE2. Design therapeutic plans from the critical and analytical study of the profiles of neuropsychological affection that are obtained from administration of diagnostic assessment instruments and their interpretation of their results	CE2.28. Practice the process of design, planning, development and evaluation of interventions in the field of Neuropsychological Rehabilitation CE2.29. Identify, manage and interpret the different evaluation techniques and tools CE2.30. Prepare neuropsychological reports
CE3. Use current cognitive intervention strategies	CE3.21. Contribute to the comprehensive care of people with acquired brain injury in therapeutic team work CE3.22. Recognize the main physical, psychological and social complications that people with brain injury can present CE3.23. Identify and select the techniques and strategies that favor health and quality life CE3.24. Practice reeducative techniques, alternative methods and augmentative communication strategies CE3.25. Resolve in a solvent way the problems that arise in the professional environment CE3.26. Specify the main support interventions in the family and the social environment
CE4. Evaluate the impact of therapeutic interventions on specifically treated functions	CE4.6. Analyze and explain the consecutive functional changes in therapeutic interventions

General / Transversal competencies

CGT1. Apply critical, logical and creative thinking at work

- CGT2. Demonstrate respect for diversity and ethical commitment
- CGT3. Work in multidisciplinary teams sharing knowledge in a responsible manner
- CGT4. Demonstrate responsibility in decision making
- CGT5. Review and analyze the scientific literature
- CGT6. Incorporate work methodologies
- CGT7. Relate knowledge with professional practice
- CGT8. Demonstrate self-learning skills

Practices Program

The practices program is designed based on the skills to be achieved in the module and the different professional profiles of the students.

The structure, a priori, is in full weeks to ensure that the student can participate in all the activities of diagnosis and neuropsychological treatment.

The practices will be developed exclusively in the NeuorPsicoSocial Rehabilitation Area (neuropsychology or speech therapy).

We will attach on the e-learning platform a table that shows all the activities in which all the students, whatever their professional profile, will participate during the practices.

Workplan

- As soon as the Master begins, each student must send a proposal to reserve a place of internship in the Teaching Secretariat via e-mail. docencia@guttman.com.
- Adjudication of places will be made by order of reception of reservations, that is, by the day and time of sending the emails.
- Due to their capacity, each Working Area has a maximum number of simultaneous placement placements. When on the same dates there are more proposals for reservation, which of places we will get in touch with the last person who made the request, to propose new dates.
- Each student will receive, via e-mail, the confirmation and a calendar of their assigned period.
- It is recommended that the periods of practice be as follow as possible, so that the student can integrate in the day to day of the Unit and the team of professionals. Practices will not be allowed on separate days since the expected goals in this module would not be achieved.
- The days are usually about 8 hours a day, which for 5 days a week and for 5-6 weeks will complete the 210 hours of internships that the module envisages.
- Only in justified cases (e.g.: written request of the company where you work) you can request to do the practices in separate weeks.
- **Before December 31**, all practices must be awarded.
- The first day of practice students will be presented to the Teaching Secretariat, about 10 minutes before the scheduled time. The identification card will be delivered and will be accompanied in the area of practice, where it will be received by the corresponding practice coordinator.
- The coordinator will maintain an initial tutorial interview to determine specific interests and needs and will present it to the assigned tutor.

- Tutor and student will plan the individual practice program.
- When finalizing the practices the tutor will complete the evaluation sheet of practices.
- The student will assess the satisfaction, via e-learning, of the practices carried out.

Teaching methodology

The teaching methodology and the proposed evaluation may undergo some modification depending on the restrictions on attendance that the health authorities impose.

The module of practices has 15ECTS distributed according to the following table. The minimum hours of practice that must be done are 210. The practices will be carried out in the assistance areas of the Guttman Institute and the activities that are carried out in each one of them are included in the calendar.

Formative activities	ECTS	Teaching-learning methodology	Competencies
SUPERVISED ACTIVITIES			
	12.6	Tutorial Practice	CE2, CE3, CE4 CT1, CT2, CT3, CT4, CT6, CT7
AUTONOMOUS ACTIVITY			
	1.2	Autonomous study	CE2, CE3 CT1, CT5, CT8
EVALUATION ACTIVITIES			
	0.4	Practical evaluation of skills through a mixed oral and practical test	CE2, CE3, CE4 CT1, CT4, CT6, CT7

It is a requirement that the student has signed the commitment of confidentiality to perform the clinical practice.

Competences evaluation

In this practical module the attendance and participation in the programmed activities will have an important weight at the time of assessing the achievement of the competences. To approve the module, the minimum attendance will be 80%

The evaluation of the module of practices Will be carried out through two tests:

1. The development of a clinical case that the student will choose from among the patients attended during the practices period; it can be an adult patient or a child patient. The structure of the work will be as follows:
 - Description of the case (review of the clinical data present in the patient's medical record).
 - Results of the neuropsychological exploration and clinical interpretation of the data.

- Proposal of a therapeutic plan (indicating what kind of procedure will be used depending on the profile of the patient's involvement, both cognitive, behavioral and emotional)
 - The clinical case will be presented in Word format (arial 12, single line spacing), with an extension between 2-3 pages. It will be sent via e-mail to docencia@guttmann.com (the deadline for the delivery will be indicated in advance)
This evaluation activity Will represent 50% of the final grade of the module.
2. The evaluation of compliance with the competences proposed in the module. This evaluation will represent 50% of the final grade of the module.

If you do not present evidence of learning or you have not attended the minimum number of hours of activities programmed in the module (80%), the subject will be "not evaluable". You will pass the subject if you obtain a minimum score of 5 points (scale 0 – 10).

Procedure and recovery criteria

The recovery is a process that will be put into operation once the period of publication of the final grades has ended.

- You can choose if throughout the continuous evaluation you have made evidence with weight equal to or greater than 2/3 of the total score and you have obtained a grade of the module between 3.5 and 4.9 points.
- The maximum score resulting from the reevaluation process may not exceed 5 point (approved) in the final grade.

Practices tutors:

- Dra. Rocio Sánchez-Carrión rsanchezc@guttmann.com
- Dra. Celeste Aparicio caparicio@guttmann.com
- Mr. Pablo Rodríguez prodriguez@guttmann.com
- Dr. Alberto García agarciam@guttmann.com
